With an initial degree in Fine Arts, my career has evolved towards the technological field, highlighting my specialization in User Experience Design (UX) by a Google course. Driven by the desire to expand my knowledge, I immersed myself in Frontend development through Campus Dual TIC, concluding with the successful finalization of a Bootcamp in Full Stack Development.

My multidisciplinary approach and my ability to integrate creativity and technical skills makes me a versatile candidate, ready to face new challenges and continue my training as a Full Stack programmer.

🎓 Studies

Full Stack Development Bootcamp, *CampusDualTIC*
